VIRELLI

Clarity Health Check

An expert review of how your organization configures and uses Clarity®, with clear, prioritized recommendations to get more from it.

Getting the most from Clarity?

- Have process or organizational changes left your configuration out of step?
- Are stakeholders asking for better visibility or reporting?
- Is adoption inconsistent across teams?

What you receive

- A current-state snapshot of your environment
- Adoption and usage insights by team
- Process and configuration findings
- Near-, mid-, and long-term roadmap

How it works

1. **Understand** — Workshops with your Clarity users
2. **Assess** — Review of configuration and usage
3. **Prioritize** — Findings and next steps, by priority
4. **Review** — Walk through results with your team

What we assess

Platform health

- Configuration fit with current processes
- Project, time, resource, and financial setup
- Data and setup affecting performance

Adoption and value

- Experience for teams, managers, and executives
- Reporting and stakeholder visibility
- Underused capabilities and process gaps
